

## Medical References

The science of L-Arginine can be referenced from the published work of some of America's top doctors who have written best-selling books on combating cardiovascular disease. Their books are available in libraries and bookstores. They are being quoted here for general scientific reference only. Any endorsement by them of our product is not implied.

**Dr. Louis J. Ignarro**, Winner of Nobel Prize in Medicine 1998, Distinguished Professor of Pharmacology at UCLA Medical School, and author of *No More Heart Disease*, has discovered that you can prevent cardiovascular disease and help reverse it—without prescription drugs. In his book, he says

- "L-Arginine, working wonders without a downside." p. 92
- "It is best to take L-Arginine just before retiring for the night. Most heart attacks occur at night, during the early morning hours, when our endothelial cells produce only minimal amounts of nitric oxide." p. 91
- "L-Arginine is a very safe amino acid and can be taken at the 4 to 6 grams dose without any worry about toxicity. No side effects have been reported in the medical literature." p. 92-93

**Dr. John P. Cooke**, Head of Stanford University Medical School Vascular Unit, says in his book *The Cardiovascular Cure*:

- "L-Arginine (nitric oxide) slows (arterial) plaque growth and suppresses atherosclerosis." p. 21
- "Research at Stanford University (has shown that) we can prevent or even reverse atherosclerosis." p. 40
- "We used to think that hardening of the arteries was inevitable. We know now that this is not true." p. 40

## Medical Advisors

ACCTRIX is developed by a team of American doctors, pharmacists, and healthcare professionals whose expertise in the field of wellness is most highly respected in the USA.

**Dr. Robert A. Anderson**, Medical Doctor for over 30 years, founding member and past President of the American Holistic Medical Association, says in his book *Clinician's Guide to Holistic Medicine*:

- "L-Arginine is beneficial in angina and peripheral circulation problems. Arginine is the substrate for the synthesis of nitric oxide, a potent vasodilator." p. 29
- "Magnesium levels in diabetics with cardiac complications are significantly lower than in those without cardiac problems." p. 189

**Dr. Perry Chinn**, Doctor of Chiropractic, with 24 years of private practice in the USA, has studied the importance of nutrition in the well-being of his patients. He has done extensive study on L-Arginine and contributed towards the creation of ACCTRIX. He strongly recommends ACCTRIX to his patients, while he takes ACCTRIX himself everyday. In his book, *Soaring Beyond Fear*, he says

- "Because the science and results of this Nobel prize winning discovery have been largely ignored by traditional medicine, they remain largely unknown to the general population." p. 225
- "It is my hope that we can help reverse to a large degree this cardiovascular time bomb." p. 225

**GMP**  
CERTIFIED

Team ACCTRIX USA

**ACCTRIX is manufactured in the USA in a GMP Certified and FDA Inspected facility.**

At Unisal Wellness Technologies, we strive to deliver excellence in all that we do, from the quality of our products to the professionalism of our people.

# Acctrix™

Finest all-natural Cardiovascular Formula  
AS A DIETARY SUPPLEMENT

# The Science of Wellness

ACCTRIX can help enhance your health and save your life.

ACCTRIX is the world's leading cardiovascular formula offered as a dietary supplement. It is a proprietary blend of all-natural ingredients formulated in just the right mix and dosage, including the use of L-Arginine whose benefits in helping fight heart disease are well documented in medical research and clinical testing. The science of ACCTRIX is based on the thesis of the 1998 Nobel Prize in Medicine.

One in four persons in America suffers from some form of heart disease with millions more at risk, resulting in sudden death for many. Other types of vascular disease, such as complications of diabetes, erectile dysfunction and hypertension, will afflict millions more.

ACCTRIX is the world's leading cardiovascular formula offered as a dietary supplement. It is a proprietary blend of all-natural ingredients formulated in just the right mix and dosage, including the use of L-Arginine whose benefits in helping fight heart disease are well

ACCTRIX is developed by a team of American doctors, pharmacists and nutrition specialists. A portion of the sales proceeds of ACCTRIX will go to support cardiovascular research.

ACCTRIX is the world's leading cardiovascular formula offered as a dietary supplement.

documented in medical research and clinical testing. The science of ACCTRIX is based on the thesis of the 1998 Nobel Prize in Medicine.

- In 1998, the Nobel Prize in Medicine was awarded to three American doctors for their work on nitric oxide (NO) and their discovery of the role that L-Arginine plays in the production of nitric oxide in the body. Nitric oxide is a powerful "vasodilator", meaning that it helps keep your arteries open and maintains their smooth texture so that blood can flow through them easily. However, certain people, like smokers, diabetics, the obese, those with high cholesterol and/or high blood pressure, as well as people with heart disease, appear to have decreased nitric oxide production. The lining of their arteries becomes rough, eventually leading to the build-up of cholesterol and plaque and thereby increasing the potential for obstruction. Fortunately, L-Arginine comes to the rescue. **Hundreds of clinical studies have demonstrated the effectiveness of L-Arginine in helping the body produce the necessary nitric oxide, which in turn helps dilate blood vessels and improve blood flow. Nitric oxide is essential for the optimal functioning of blood vessels because it assists blood flow. It has also been shown to reduce dangerous plaque build-up in the arteries and affects other physiological functions such as inflammation and oxygen release from red blood cells. The proper level of nitric oxide in the body is essential to health and wellness.**

Improving your intake of L-Arginine is not as simple as increasing the intake of L-Arginine-rich food in your diet, because the most common L-Arginine-rich food also tend to be high in fat and cholesterol (food like red meat and shellfish). You would have to take 10 or more giant 500 mg pills each day to get a useful dose of L-Arginine. *So what is your best option?*

## The answer: Take ACCTRIX.

ACCTRIX is 100% natural. No artificial flavors or additives of any kind are used in ACCTRIX.

Some of the health benefits of L-Arginine, as used in ACCTRIX, are:

- Improved blood flow and decreased vessel blockage.
- Decreased symptoms associated with congestive heart failure.
- Reduced incidence of strokes and blood clots.
- Improved outcome after heart bypass surgery.
- Decreased hypertension and normalized blood pressure.
- Reduced damage due to peripheral artery disease.
- Increased heart stroke volume and cardiac output, essential for athletes or anyone under stress.

The Nobel winning science has also shown that:

- L-Arginine helps fight diabetes by dramatically improving circulation thereby reducing the damage of diabetes.
- L-Arginine helps reduce free-radical damage.
- L-Arginine helps improve blood flow in the lungs, which is helpful in fighting asthma.

Take ACCTRIX once a day at night, or twice a day morning and night.

ACCTRIX comes in bottles with labels of different colors for different countries.

ACCTRIX is available in powder form, for optimal efficiency in absorption by your blood streams.

- L-Arginine is one of the most powerful tools in any anti-aging program. As a precursor to nitric oxide, L-Arginine plays a direct role in the dilation and constriction of small blood vessels in the brain and therefore may have a positive effect on cerebral function. It has been shown to improve memory function and to be a factor in limiting the effects of dementia and Alzheimer's.
- L-Arginine, in combination with other powerful ingredients carefully researched and selected by our team of doctors and scientists, has made ACCTRIX a most effective cardiovascular formula in the world.

*"ACCTRIX is an excellent formula, with the finest all-natural ingredients in a most outstanding blend, the best on the market that I have seen as a pharmaceutical professional."*

CLELL FOWLES  
PHARMACIST

ACCTRIX is a proprietary blend of all-natural ingredients: L-Arginine, L-Citrulline, Magnesium, Calcium, Red Wine Extract, Chromium, D-Ribose, Folic Acid, Vitamins B6, B12, D3, K2, etc. They are blended together in just the right mix, to provide you with the correct daily dosage of a Cardiovascular Formula that really works for you in your body.

### L-Arginine

The core ingredient, derived from plants. Its functions and benefits have been described in the previous sections of this report.

### L-Citrulline

Citrulline is an amino acid which is converted in time to Arginine. This makes ACCTRIX into a "time-released" Arginine product - the benefits of Arginine and nitric oxide are realized for a sustained period of time.

### Magnesium

Magnesium deficiency can cause metabolic changes that may contribute to heart attacks and strokes. Low body stores of magnesium increase the risk of abnormal heart rhythms, which may increase the risk of complications associated with a heart attack. Population surveys have associated higher blood levels of magnesium with lower risk of coronary heart disease. Dietary surveys have suggested that a higher magnesium intake is associated with a lower risk of stroke. Magnesium is also important to carbohydrate metabolism. It may influence the release and the activity of insulin, the hormone that helps control blood glucose levels. Elevated blood glucose levels increase the loss of magnesium in the urine, which in turn lowers blood levels of magnesium. This explains why low blood levels of magnesium (Hypomagnesemia) are seen in poorly controlled Type 1 and Type 2 Diabetes.

### Vitamin D3

Research has shown that individuals with various types of cardiovascular disease also suffer from vitamin D3 deficiency. (Note: there are two forms of vitamin D: D2 and D3) Besides the cardiovascular system, D3 also benefits the bones and the immune system. It has also been shown to help improve seasonal mood disorders.

### Vitamin K2

Vitamin K2 is essential to the cardiovascular system. Research has shown that K2 helps reverse the calcification of arteries ("hardening of the arteries"). This benefit helps decrease the chance of heart attacks, strokes and kidney disease, among other benefits.

### Vitamins B6, B12 and Folic Acid

These vitamins help to recycle and eliminate homocysteine from the system. Homocysteine is an amino acid which has been shown to be present in high levels in individuals suffering from cardiovascular disease. As levels of homocysteine are reduced, so is the level of heart disease. These vitamins are responsible for fueling the reactions of the body which reduces homocysteine from the system.

### D-Ribose

Studies on D-Ribose have shown that it helps increase the amount of oxygen to the heart muscle. This reduces stress on the heart and aids in keeping the "plumbing" of the heart in proper working order.

### Chromium

Chromium helps the body in regulating insulin and blood sugar. This is extremely important to the cardiovascular system since high levels of sugar (glucose) can lead to diabetes and increase the clogging of arteries.

### Calcium

Calcium is not only important to healthy teeth and bones, it also helps regulate different functions in the body including hormone production and nerve/muscle regulation, which are very important to a healthy cardiovascular system and to the overall wellness of the body.

### Red Wine Extract

This is the source of the "French paradox" - the fact that Frenchmen eat extremely high fat diets yet have very good cardiovascular systems. One of the reasons they achieve this is through their consumption of red wine. This extract contains the beneficial antioxidants found in the French red wine which helps keep the cardiovascular systems of the French in shape in spite of their fat-rich diets. The potent antioxidants in the red wine extract help to relax blood vessels and are also very beneficial to the immune system.
