Dr. Louis J. Ignarro, Winner of Nobel Prize in Medicine 1998, Distinguished Professor of Pharmacology at UCLA Medical School, and author of No More Heart Disease, has discovered that you can prevent cardiovascular disease and help reverse it—without prescription drugs. In his book, he says:

• “L-Arginine, working wonders without a downside.” p. 92
• “It is best to take L-Arginine just before retiring for the night. Most heart attacks occur at night, during the early morning hours, when our endothelial cells produce only minimal amounts of nitric oxide.” p. 91
• “L-Arginine is a very safe amine and can be taken at the 4 to 6 gram dose without any worry about toxicity. No side effects have been reported in the medical literature.” p. 92-93

Dr. John P. Cooke, Head of Stanford University Medical School Vascular Unit, says in his book The Cardiovascular Cure:

• “L-Arginine (nitric oxide) slows (arterial) plaque growth and suppresses atherosclerosis.” p. 21
• “Research at Stanford University (has shown that) we can prevent or even reverse atherosclerosis.” p. 40
• “We used to think that hardening of the arteries was inevitable. We know now that this is not true.” p. 40

Dr. Robert A. Anderson, Medical Doctor for over 30 years, founding member and past President of the American Holistic Medical Association, says in his book Clinician's Guide to Holistic Medicine:

• “L-Arginine is beneficial in angina and peripheral circulation problems. Arginine is the substrate for the synthesis of nitric oxide, a potent vasodilator.” p. 29
• “Magnesium levels in diabetics with cardiac complications are significantly lower than in those without cardiac problems.” p. 189

Dr. Perry Clark, Director of Epidemiology, with 30 years of patient practice in the USA, has studied the importance of nutrition in the well-being of his patients. He has done extensive study on L-Arginine and published two books on the subject. He strongly recommends ACCTRIX to his patients, while he takes ACCTRIX himself everyday. In his book, Scary Disease, he says:

• “Because the science and results of this Nobel-prize-winning discovery have been largely ignored by traditional medicine, they remain largely unknown to the general population.” p. 203
• “It is my hope that we can help reduce our huge degree of cardiovascular illness burden.” p. 225

At Unisal Wellness Technologies, we strive to deliver excellence in all that we do, from the quality of our products to the professionalism of our people.
ACCTRIX is the world-leading cardiovascular formula offered as a dietary supplement. It is a proprietary blend of all-natural ingredients formulated in just the right mixture and dosage, using the expertise of ACCTRIX’s scientists in helping heart disease patients are well-documented in medical research and clinical testing. The science of ACCTRIX is based on the thesis of the 1998 Nobel Prize in Medicine. ACCTRIX is developed by a team of American doctors, scientists, and nutrition specialists. A portion of its profits will go to support cardiovascular research. ACCTRIX is the world's leading cardiovascular formula offered as a dietary supplement.

One in four persons in America suffers from some form of heart disease with millions at risk, resulting in sudden death from many. Other types of vascular disease, such as complications of diabetes, stroke, venous disorders and hypotension, will affect millions more.

Improving your intake of L-Arginine is not as simple as increasing the intake of L-Arginine-rich food in your diet, because the most common L-Arginine-rich foods also need to be high in fat and cholesterol (food like red meat and shellfish). You would have to take 10 or more giant 500mg pills each day to get a useful dose of L-Arginine. As such, for your convenience...

The answer: Take ACCTRIX.

ACCTRIX is 100% natural. No artificial flavors or additives of any kind are used in ACCTRIX.

Some of the health benefits of L-Arginine, as used in ACCTRIX are:

- Improved blood flow and lowered blood pressure.
- Diminished symptoms associated with angina pectoris.
- Reduced incidence of strokes and blood clots.
- Improved immune function after heart surgery.
- Diminished hyperactivity and normalized blood pressure.
- Reduced damage due to peripheral artery disease.
- Improved heart rate control and cardiac output, essential for athletes or anyone under stress.

The Nobel winning science has also shown that:

- L-Arginine helps fight diabetes by dramatically improving circulation, thereby reducing the damage of diabetes.
- L-Arginine helps reduce free radical damage.
- L-Arginine helps improve blood flow in the lungs, which is helpful in fighting chest pain.

Take ACCTRIX once a day at night, or twice a day morning and night.

L-Arginine is one of the best proven methods in any anti-aging program. As a precursor to nitric oxide, L-Arginine plays a direct role in the dilation and constriction of small blood vessels in the lungs and brain and may also have a positive effect on cardiac function. It has been shown to improve memory function and to be a shock for limiting the effects of dementia and Alzheimer’s disease.

ACCTRIX comes in bottles with labels of different colors for different countries. The 30 capsules bottles contain ACCTRIX: 36 capsules with L-Arginine, 36 capsules with L-Citrulline, 36 capsules with Magnesium, and 36 capsules with Vitamin B6. The 60 capsules bottles contain ACCTRIX: 54 capsules with L-Arginine, 54 capsules with L-Citrulline, 54 capsules with Magnesium, 54 capsules with Vitamin B6, 54 capsules with Vitamin B12, and 54 capsules with Folic Acid. They are blended together in just the right mix, to provide you with the correct daily dosage of Acctrix, a Cardiovascular Formula that really works for you in your body.

Vitamin B6 helps the body make and use protein. It is very beneficial to the immune system.

Vitamin B12 helps the body make and use protein. It is very beneficial to the immune system.

Calcium Calcium is not only important in healthy teeth and bones, it is also very important to the cardiovascular system. As a mineral, it helps regulate blood pressure and nerve impulses. Calcium also helps to keep blood vessels healthy.

Red Wine Extract Red Wine Extract is the source of the Flavonoids called Resveratrol. Resveratrol is an all-natural antioxidant that helps to keep the body “young.”

Nutrients like D-Ribose help to improve heart health. D-Ribose is a powerful supplement that improves heart health and is beneficial for anyone under stress.

Vitamin D3 Research has shown that individuals with various types of cardiovascular diseases also suffer from Vitamin D deficiency (Note: there are two forms of vitamin D: D2 and D3). Besides the cardiovascular benefits, Vitamin D3 helps maintain the bones and the immune system. It also helps the body more properly respond to abnormal blood glucose levels.

Chromium Chromium is both a hormone and a mineral that helps the body maintain normal blood sugar levels.

Vitamins B1, B2 and Folic Acid These vitamins help to make and use protein. They are also very beneficial to the immune system.

Vitamin B6 helps the body make and use protein. It is very beneficial to the immune system.

Vitamin B12 helps the body make and use protein. It is very beneficial to the immune system.

Calcium Calcium is not only important in healthy teeth and bones, it is also very important to the cardiovascular system. As a mineral, it helps regulate blood pressure and nerve impulses. Calcium also helps to keep blood vessels healthy.
